

## CASE STUDY:

# Chemical Products Manufacturer

### Situation

Client was embarking on a multi-billion dollar, multi-year expansion project to increase production capacity and position itself as the largest producer in North America.

### Issue

This was the first expansion of this magnitude for the client in over 10 years. Ninety percent of the organization's project team was not involved in the previous expansion.

### Need

The client needed to augment its internal project team with dedicated personnel who were experienced in capital project execution.

### Solution

PPMG provided management and reporting solutions in project management and procurement team leadership to develop contract strategies, lead vendor negotiations, and engineer equipment oversight.

### Result

PPMG provided schedule and cost efficiencies to maximize vendor productivity that eliminated millions of dollars in potential change orders and a longer project duration.
